DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 23 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellenbogen.
- 3. With respect t o claim 23, Ellenbogen shows a three terminal device (see Figure 3 A D and column 9, line 7 et seq.) with a pair of tunnel junctions and a molecule which is effectively an island and having energy bands of molecular orbitals. The molecules function as islands and there is a quasi-continuum of energy states. The barriers inherently have a resistance less than or equal to the quantum resistance.
- 4. With respect to claim 24 the energy states are shifted by application of a voltage (column 9, line 51) with an electrode capacitively coupled.
- 5. With respect to claim 25, a current is passed (column 9, line 57).

Response to Arguments

- 1. Applicant's arguments filed 1/24/05 have been fully considered but they are not persuasive.
- 2. Applicant argues that Ellenbogen does not show islands but the structure shown in the Figures function as islands and the claimed features are shown.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A. Wille whose telephone number is (571) 272-1721. The examiner can normally be reached on M-F (6:15-2:45).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (571) 272-1705. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
